

EXTRA WERKBOEKJE

GROEP 8

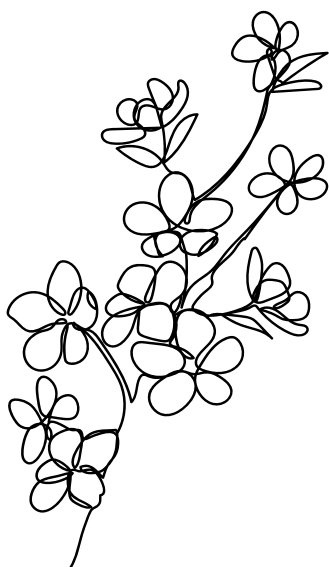

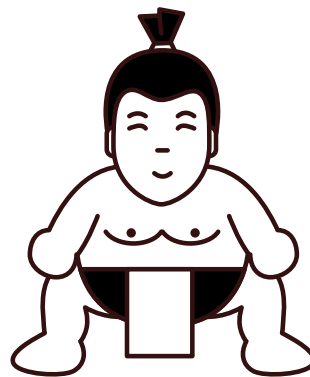

Naam: _____

SUDOKU

In elk vierkantje moeten de getallen 1 t/m 4 of 1 t/m 6 komen te staan.
Maar let op: per rij of kolom mag elk cijfer ook maar één keer voorkomen.

REKENSLANGEN 0 – 100

Begin bij het getal links in de slang en schrijf het antwoord rechts in het lege rondje.

Let op: de som loopt dus door!

De som bij de eerste slang is dus: $53 + 7 + 14 - 36 - 8 = \dots$

The worksheet contains four snakes, each with a sequence of math problems in circles. The snakes are decorated with various jungle plants like monstera leaves, ferns, and a large snake with orange and green patterns.

Snake 1 (Top Left): Starts with 53. Operations: $+ 7$, $+ 14$, $- 36$, $+ 8$. Ends with an empty circle.

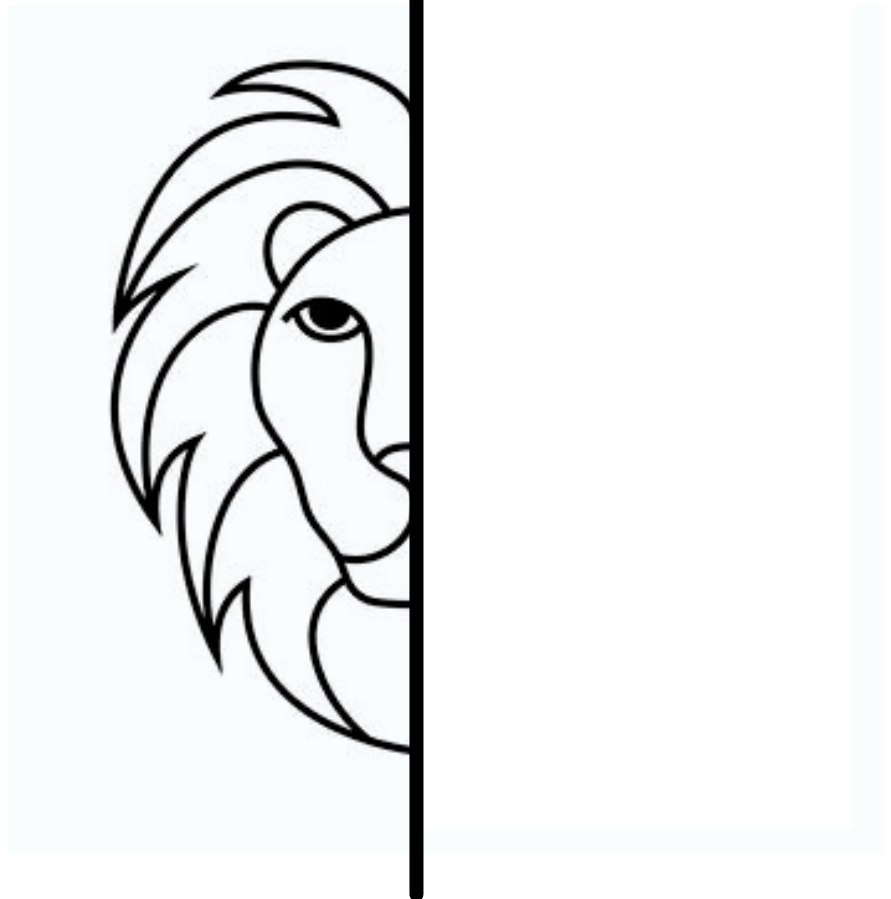

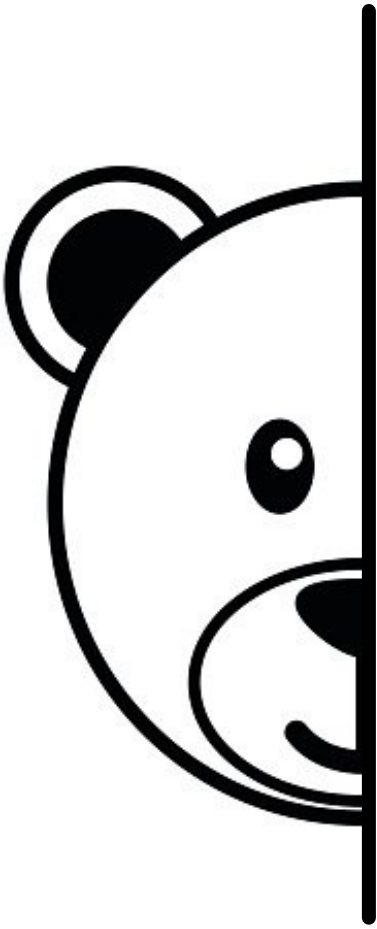

Snake 2 (Top Right): Starts with 77. Operations: $+ 5$, $- 12$, $- 28$, $+ 4$. Ends with an empty circle.

Snake 3 (Middle Left): Starts with 32. Operations: $- 13$, $+ 6$, $- 17$, $- 7$. Ends with an empty circle.

Snake 4 (Bottom Left): Starts with 81. Operations: $- 11$, $- 15$, $- 6$, $+ 17$, $- 18$, $+ 25$. Ends with an empty circle.

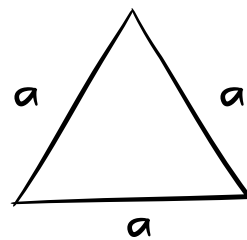

Snake 5 (Bottom Right): Starts with 29. Operations: $- 5$, $+ 33$. Ends with an empty circle.
